

To:  
Vice-President Margaritis Schinas  
Commissioner for Home Affairs, Ylva Johansson  
Federal Minister for the Interior, Horst Seehofer

Brussels, 11 September 2020

Dear Vice-President Schinas,  
Dear Commissioner Johansson,  
Dear Minister Seehofer,

The fire in the EU's biggest refugee camp Moria is a humanitarian disaster and a disaster for Europe as a whole. For far too long, Europe has ignored that the camp was heavily overcrowded and that people had to stay in Moria for years under slum-like circumstances. They had no access to proper sanitary facilities nor to appropriate accommodation. When Covid-19 broke out, not just the infected persons were put under quarantine, but the entire camp. More than 12.000 people were locked in a place where they had no possibility to protect themselves from the virus. The catastrophe was predictable. It is a shame for Europe that it was not prevented.

After Moria burnt down, more than 12.000 people are now stranded without even a tent or a roof over their heads. They urgently need our help. We, the undersigning MEPs urge you to provide immediate humanitarian and medical help, to evacuate the people as swiftly as possible and to provide a sustainable solution for the people of Moria by relocating them to other Member States.

We call on you to support Greece with corona tests of all asylum seekers and locals on the island and with medical personnel and equipment for people with severe disease progression. Many of us, including the President of our House, have already at the beginning of the Covid-19 crisis called for an evacuation of the camp and the relocation of asylum seekers from Moria to avoid an outbreak. We acknowledge that it is a challenge to evacuate now more than 12.000 persons at once and encourage you to look into all possibilities. People who cannot be immediately transferred to the mainland could also preliminarily be accommodated in cruise ships, which due to Covid-19 are currently out of operation, before they are relocated. In any case, we call on you to support Greece in providing emergency accommodation for the people of Moria where they can protect themselves from the virus.

We further urge you to ensure the relocation of asylum seekers from Moria to other Member States. Taking care of the people of Moria is not just the responsibility of Greece. Moria is a European refugee camp, and Europe has to stand by its responsibility. Many municipalities and regions in Europe have long declared their willingness to receive asylum seekers from Greece. Since Wednesday night, thousands of people went on the streets to show their solidarity with the people of Moria and to call for their swift relocation. We fully support their call. We call on you to uphold our common European values and to relocate the people of Moria to places where they can find safety and dignified living condition.

Reconstructing Moria is not a solution, nor is it as solution to create similar conditions in other camps. It will only lead to the same problems that have caused the catastrophe.

We call on you to ensure that the upcoming Pact on Migration and Asylum will be based on solidarity and the fair sharing of responsibilities among Member States. We must make sure that a humanitarian disaster like in Moria will never happen again.

We urge you to do everything possible to help the people of Moria and to show European solidarity!

Sincerely yours,

Erik MARQUARDT (Greens/EFA), initiator of the letter
